FREQUENTLY ASKED QUESTIONS

Why iStent infinite® for glaucoma?

If left untreated, glaucoma can lead to vision impairment and even blindness. iStent infinite® is designed to relieve eye pressure and slow the progression of the condition.

What other benefits does iStent infinite® have?

With 24/7 control over eye pressure, iStent infinite® may also reduce reliance on bothersome eye drops.

How does iStent infinite® work?

As one of the world's smallest implantable devices, iStent infinite® uses 3 micro-sized stents to create openings through the eye's natural filter to help the fluid in the eye drain properly.

What can I expect from the procedure?

Unlike more invasive glaucoma procedures, iStent infinite® preserves 97% of your eye's natural tissue. Once implanted, these stents are so small you will not be able to see or feel them, but they will be working constantly to reduce eye pressure.
